

HIV/AIDS testing and treatment for LGBT people

With the LO Community Center we will run a unique project with public and PNFP facilities in Rupidamphi, to provide high quality health services to people who identify as LGBT.

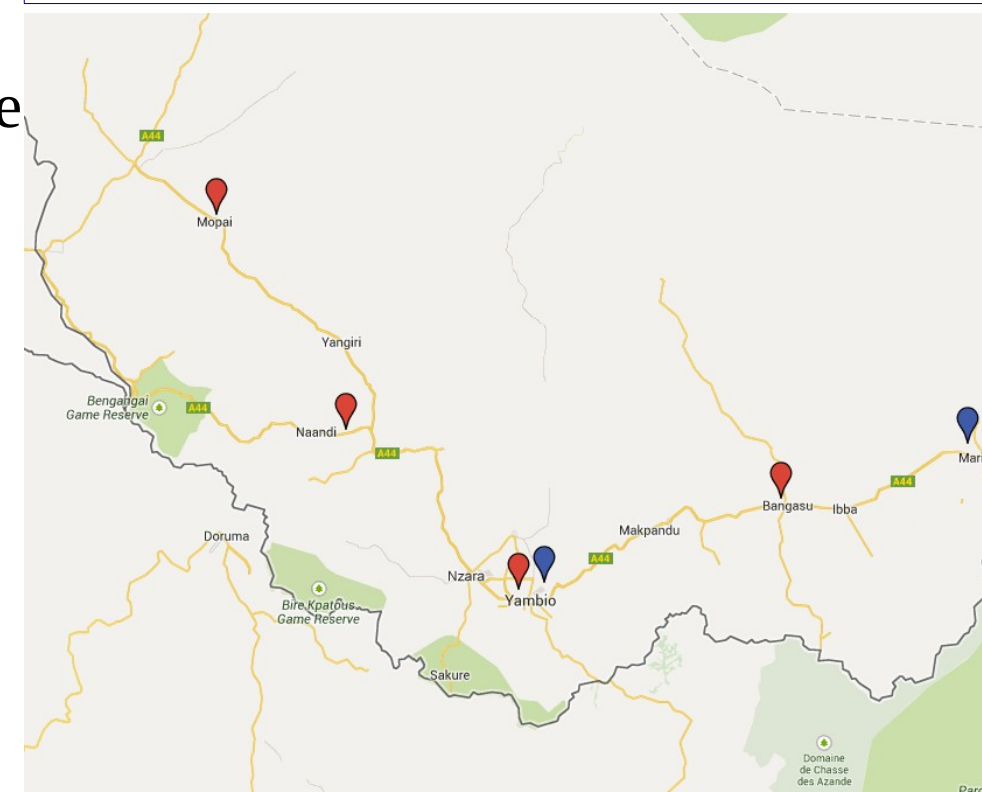

Since 2009, an adjusted performance based approach was utilized contracting 8 PNFP facilities with an indicator which is used to measure performance by the Rupidamphi Medical Bureau. After an assessment of current performance, 4 clinics were selected. Provision of HIV/AIDS health services, notably to LGBT people, was far below the national norm. With this intervention we want to improve service provision and examine the suitability of the JBF intervention methodology.

Activities

- Quality of care assessment of all clinics twice a year
- Quarterly meetings with the JBF steering committee to review the business plans and give remedial action if needed
- LO Community Center will compile a list of LGBT community leaders to reach out to potential beneficiaries.

PNFP: private not-for-profit

JBF: “op z'n janboerenfluitjes”, clumsy and primitive

“Ramla Yawá Kamaria”: supposedly means “'Predictor of the future' 'Born on Thursday' 'Moon'” (the transaction dates are on the first Thursday each Quarter)
